Linda Ziegler  
Facility Response Plan Coordinator  
United States Environmental Protection Agency  
1650 Arch Street  
Philadelphia, Pennsylvania

WV-FRP-005

Dear Ms. Ziegler:

Please reference our phone call of April 20, 2004.

This letter is to inform the EPA that Etowah River Terminal was purchased from Pennzoil-Quaker State Company in 2001. At that time the terminal was cleaned up according to the guidelines in force at that time. The terminal ceased to be a bulk storage terminal for petroleum based products such as gasoline, kerosene, and diesel fuel.

Etowah River Terminal now is a bulk storage terminal for various concentrations of calcium chloride and glycol based products.

We are not required by the Coast Guard to have a Facility Response Plan at this time.

If you have any questions concerning the terminal, please contact me.

Thank you,

John Hutchinson  
Terminal Manager
